SUMMARY

Self-taught full-stack developer with a strong record of learning new technologies under pressure and delivering real client projects. Started with React, Node.js, Express, MongoDB, and Tailwind, then expanded into **Shopify development, GraphQL, TypeScript, and Framer Motion** while building a complete e-commerce platform from scratch. Known for taking on challenges outside my comfort zone, breaking them down fast, and turning uncertainty into working solutions. Experienced in building **custom Shopify storefronts, role-based dashboards, API integrations, and modern, responsive interfaces**. Resourceful, adaptable, and driven, I thrive in high-pressure environments, communicate clearly with clients, and always deliver high-quality results, even when the project requires learning new tools on the fly.

EXPERIENCE

Freelance Full-Stack Developer

Self-Employed / Remote

September 2025 – Present

- Built full-stack web applications for clients using **Next.js, React, TypeScript, Express APIs, Node.js, and GraphQL**.
- Developed a **custom role-based dashboard** (Admin & Guest) with secure access, analytics, and full CRUD management.
- Created and integrated **Next.js API routes** and **Express APIs** for authentication, orders, products, and session flows.
- Designed smooth, modern UI/UX interactions using **Framer Motion**, responsive layouts, and optimized performance.
- Delivered custom e-commerce functionality like inventory syncing, metafields, discount logic, order tracking, and notifications.
- Improved SEO, metadata, and performance across all pages using Next.js best practices and dynamic routing.
- Managed client communication, requirements gathering, deployments, and technical documentation end-to-end.

PROJECT

Shopsphere E-commerce Website (MVP)

shopsphere-online.netlify.app/

- Developed a complete e-commerce platform with Stripe integration and both email & Google OAuth authentication.
- Implemented filtering/search logic for tailored product discovery.
- Order data synchronizes to the admin dashboard, with order tracking for users.
- Fully responsive UI with unique design.

Shopsphere Dashboard (MVP)

shopsphere-online.netlify.app/dashboard/login

- Built a fully functional admin dashboard with CRUD features for products & orders.
- Integrated real-time analytics for user behavior and store metrics using MongoDB cron jobs.
- Implemented role-based authentication (admin vs guest).
- Designed a custom UI with dashboard settings for better management.

engarde – Fashion E-commerce Platform

Personal Project (Solo Build) • www.engardeclothing.com/ • September 2025 – November 2025

- Designed and developed a full fashion e-commerce platform with product listings, variants, collections, and advanced filtering.
- Built a complete admin dashboard for inventory tracking, order management, customer analytics, and automated revenue snapshots.
- Integrated Shopify Storefront & Admin API to sync products, customers, checkout sessions, and metafields.
- Implemented real-time stock updates—deducting inventory after successful orders and triggering low-stock notifications.
- Developed secure customer authentication flows including sign-in, sign-up, password reset, and account activation pages.
- Added responsive UI/UX, discounts logic, newsletter subscription, and a custom “order tracking” progress system.
- Optimized SEO across metadata, OG/Twitter cards, and dynamic routing for improved discovery.

EDUCATION

Bachelor of Science in Political Science

University of Nigeria, Nsukka • Nigeria • 2024

INVOLVEMENT

Frontend Developer

9QUEST(startup) • September 2024 – January 2025

- Collaborated as a Frontend Engineer on a startup initiative (Sep 2024 – Jan 2025) aimed at rewarding intellect with cash and in-kind incentives. Although the startup didn't succeed due to funding limitations, the experience improved my collaboration skills, technical exposure, and ability to work in team environments.
-

SKILLS

- **HTML, CSS, JavaScript (ES6+)**
 - **React.js, Next.js**
 - **Tailwind CSS, Framer Motion**
 - **Node.js, Express.js**
 - **REST APIs, GraphQL**
 - **MongoDB, Mongoose**
 - **Git, GitHub**
 - **Shopify Storefront & Admin API Integration**
 - **Authentication & Authorization (JWT, Sessions)**
-
